

# Line Card 2023

# About Us

GD Rectifiers is a global manufacturer and distributor of products, services and solutions to commercial and industrial users of power electronic components.

Established in 1964, GD Rectifiers has over 50 years of extensive experience across a large range of markets, specialising in new and current technologies for industrial power control applications. An extensive product offering has built GD Rectifiers' exceptional reputation as the go-to power specialist with innovative experience across: aviation, automotive, rail, medical, industrial, and electronics markets. The company has a RISQ accreditation enabling them to supply products and services to the GB rail industry.

GD Rectifiers are an ISO 9001:2015 registered company that design and develop bespoke power semiconductor assemblies to control voltage, current and frequency for international industrial markets.

# Our Manufacturers

Alongside our official distribution partners, we also have access to the following manufacturer product ranges.

# Products & Services

GD Rectifiers designs and manufactures selenium and silicon rectifiers, suppressors, converters, inverters, regulators and all other power products for Industrial power control applications. The company distributes state-of-the-art diodes, thyristors, IGBTs and MOSFETs from the world's leading manufacturers including: IXYS, IXYS UK Westcode, Semikron, and EDI.

GD Rectifiers manufacture an extensive range of power components and assemblies. The company supplies a wide range of heatsinks suitable for power semiconductors, LED lighting and similar applications. GD Rectifiers also offer a repair and replacement service for faulty or ageing semiconductor rectifiers, converters, inverters, and regulators.

The company also supply a comprehensive range of cooling products, including heat pipe systems, insulated water coolers and mechanical clamps for capsule semiconductors. GD Rectifiers is a distribution agent for AC and DC fixed voltage fans, and can supply 110V / 230V dual input voltage fans with a variety of sizes, catering for all requirements.

# Certifications

GD Rectifiers is committed to ensuring the production and delivery of high-quality products. We strive to provide our customers with products and services that exceed their expectations.

GD Rectifiers has the following industry certifications:

- **ISO 9001:2015** - the leading quality management standard for business-to-business companies
- **RISQ Qualified** - enabling us to supply products and services to the GB rail industry
- **BSI EN 60947-4-3:2014** - compliance in low-voltage switchgear and control gear, contactors and motor starters AC semiconductor controllers and contactors for non-motor loads
- **BSI EN 60146-1-1:2010** - compliance in semiconductor converters, general requirements and line commutated converters, specification of basic requirements

# Technical Support & Expert Advice

We work closely with engineers, buyers and procurement specialists to share our knowledge and aim to provide unbeatable technical support on every project, offering replacement part recommendations, cost effective sourcing solutions, obsolescence support and customised products and designs.

Providing technical support and account management when you need it. GD Rectifiers prides itself on it's outstanding end-to-end service by working directly with customers on the design process in order to connect them to the right technology, at the right time, at the right price.

We're excited to offer customers direct access to our technical and engineering teams, customers can liaise with the same representative from initial enquiry right the way through to delivery, saving you time and money on planning your projects.

# Dedicated Sales Team

---

GD Rectifiers have a dedicated technical sales team supplying a complete power electronic component solution to all power electronic market sectors.

GD Rectifiers is the UK's leading distributor for some of the world's largest power electronic component manufacturers. GD Rectifiers also offers complete custom heatsink and power assembly design and manufacturing capabilities, alongside a wide range of contract manufacturing services.

With its technical and commercial expertise acquired over the past 50 years, GD Rectifiers offers the highest quality service whilst giving the most competitive engineered power component pricing and solution.

## Sales Representatives

GD Rectifiers' central sales team are based in their Head Office in Burgess Hill, West Sussex, UK. They also have a regional sales team that travel across the UK to discuss client requirements and support customers worldwide through telephone and email. The sales team have over 100 years combined experience in design, manufacture and sales of power electronic components and custom power solutions.

# Markets & Applications

An extensive product offering has built GD Rectifiers exceptional reputation as the go-to custom power specialist with innovative experience across a wide range of applications, markets and industries.

GD Rectifiers utilises its dedicated team of engineers to help customers with voltage, current and frequency requirements, alongside thermal management and circuit protection design challenges.
